

Saccharomonospora viridis K185
RNase P RNA

The diagram illustrates the secondary structure of the RNase P RNA from *Saccharomonospora viridis* K185. The structure is characterized by a large internal loop on the left side, a long stem on the right side, and several smaller loops and bulges. The sequence is written in a standard RNA notation (A, U, G, C) with some modifications indicated by dots and circles. The structure is shown in a 2D representation, with the sequence starting at the top and ending at the bottom.
