

*Chlamydia psittaci*  
partial RNase P RNA sequence  
(Herrmann sequence)

Diagram illustrating the secondary structure of the partial RNase P RNA sequence (Herrmann sequence) from *Chlamydia psittaci*. The structure shows various stems and loops, with nucleotides labeled by their bases (A, U, G, C). Modified bases are indicated by lowercase letters (a, u, g, c). Two specific nucleotides are highlighted with black dots: a G at position 10 and a U at position 110. A scale bar at the bottom indicates a length of 100 nucleotides.
