

Thermoleophilum album
partial RNase P RNA sequence

Diagram illustrating the secondary structure of a partial RNase P RNA sequence from *Thermoleophilum album*. The structure shows a complex fold with multiple stems and loops, characteristic of an RNA molecule. The sequence is written in black text, with some bases in lowercase (a, c, g, u) indicating specific modifications or uncertainties. The structure includes a long stem on the left, a large loop in the center, and several smaller stems and loops on the right and bottom.
